Author Index Volume 143 (2002)

Al-Jarrah, A., K.M. Dempsey and M.L. Glasser, Generalized series of Bessel functions 1–8
Al-Said, E.A. and **M.A. Noor,** Quartic spline method for solving fourth order obstacle boundary value problems 107–116
Alfy, I., see **Wolberg, G.** 145–188

Benito, M. and **J.L. Varona,** Pythagorean triangles with legs less than n 117–126
Betts, J.T., N. Biehn, S.L. Campbell and **W.P. Huffman,** Compensating for order variation in mesh refinement for direct transcription methods II: computational experience 237–261
Biehn, N., see **Betts, J.T.** 237–261
Bracciali, C.F., D.K. Dimitrov and **A. Sri Ranga,** Chain sequences and symmetric generalized orthogonal polynomials 95–106

Cabada, A. and **S. Heikkilä,** Extremality results for discontinuous explicit and implicit diffusion problems 69–80
Campbell, S.L., see **Betts, J.T.** 237–261
Cash, J.R., M.P. Garcia and **D.R. Moore,** Mono-implicit Runge–Kutta formulae for the numerical solution of second order nonlinear two-point boundary value problems 275–289
Čermák, J., A change of variables in the asymptotic theory of differential equations with unbounded delays 81–93
Choe, G.H. and **D.H. Kim,** The first return time test of pseudorandom numbers 263–274

Dempsey, K.M., see **Al-Jarrah, A.** 1–8
Dimitrov, D.K., see **Bracciali, C.F.** 95–106

Garcia, M.P., see **Cash, J.R.** 275–289
Ge, L. and **J. Zhang,** Symbolic computation of high order compact difference schemes for three dimensional linear elliptic partial differential equations with variable coefficients 9–27
Glasser, M.L., see **Al-Jarrah, A.** 1–8

Haddar, H. and **P. Joly,** Stability of thin layer approximation of electromagnetic waves scattering by linear and nonlinear coatings 201–236
Heikkilä, S., see **Cabada, A.** 69–80
Huffman, W.P., see **Betts, J.T.** 237–261

Jackiewicz, Z. and **R.A. Renaut,** A note on stability of pseudospectral methods for wave propagation 127–139
Joly, P., see **Haddar, H.** 201–236

Kim, D.H., see **Choe, G.H.** 263–274

Lenferink, W., A second order scheme for a time-dependent, singularly perturbed convection–diffusion equation 49–68
Li, Z.-C., see **Wang, S.** 291–310
Liao, X., Z. Wu and **J. Yu,** Stability analyses of cellular neural networks with continuous time delay 29–47

Moore, D.R., see **Cash, J.R.** 275–289

Noor, M.A., see **Al-Said, E.A.** 107–116

Ohe, T., see **Yamatani, K.** 189–200
Ohnaka, K., see **Yamatani, K.** 189–200

Piazza, G. and **T. Politi,** An upper bound for the condition number of a matrix in spectral norm (*Letter to the editor*) 141–144
Politi, T., see **Piazza, G.** 141–144

Renaut, R.A., see **Jackiewicz, Z.** 127–139

Sri Ranga, A., see **Bracciali, C.F.** 95–106

Varona, J.L., see **Benito, M.** 117–126

Wang, S. and **Z.-C. Li,** An analysis of a conforming exponentially fitted finite element method for a convection–diffusion problem 291–310
Wolberg, G. and **I. Alfy,** An energy-minimization framework for monotonic cubic spline interpolation 145–188
Wu, Z., see **Liao, X.** 29–47

Yamatani, K., T. Ohe and **K. Ohnaka,** An identification method of electric current dipoles in spherically symmetric conductor 189–200
Yu, J., see **Liao, X.** 29–47

Zhang, J., see **Ge, L.** 9–27
